# LIVE THE ADVANTAGE

The pace of today's life demands continuous upgrades in efficiency and ways to live smarter. At Legrand, we anticipate your needs with technologically advanced products, investing as much as 5% on Research and Development to deliver superior electrical and digital building infrastructure.

As global specialists, we make things that are not just essential but actually desirable. Our engineering is exacting and is fuelled by design thinking. We call this Designeering. It's not just a deep understanding of our markets, but delivering innovation and technology for uninterrupted living.

Such expertise helps us fulfil your needs. It also ensures that we're a step ahead, launching innovative products that change the way you look at form and function. Like the revolutionary Duo Boxx Distribution Board. It combines strength with aesthetics to give you the advantage. Twice over.

In the beginning, distribution boxes were wood till they were replaced with metal. Distribution boards were treated as square boxes which performed a functional purpose. They were relegated to discrete corners of your home, as quickly forgotten as they were installed. Not any more.

Presenting Duo Boxx, the hybrid distribution board that reimagines the purpose and utility of a distribution board. Duo Boxx binds plastic with metal to give you every advantage. From aesthetics to strength to start something altogether new. A fresh beginning.
