ELEVATING ELECTRICAL  
INFRASTRUCTURE  
FOR THE BFSI SECTOR

A financial institution in Goregaon upgraded its electrical infrastructure with scalable, high-quality solutions with Legrand's advanced range of switches, sockets, distribution boards, power switchgears, racks and raceways to ensure reliability and future readiness.

## Challenges

The client needed durable, high-performance electrical solutions for safety, efficiency and long-term reliability without disrupting operations.

## Legrand's Solution

Legrand's Specification Team and Sales Team collaborated closely with the stakeholders to deliver a tailored electrical solution, integrating:

- Energy-efficient switches and sockets to reduce power consumption and optimize energy usage.
- High-quality distribution boards, power switchgears, and raceways to establish a robust and dependable electrical infrastructure.

## Implementation

The project was executed in phases to minimize disruption to site activities:

**Material Readiness:** Materials were sourced and made available promptly based on consultant recommendations, ensuring project timelines remained on track.

**Seamless Execution:** A structured approach to implementation ensured minimal downtime while adhering to strict schedules and maintaining uninterrupted operations.

Legrand's energy-efficient solutions played a critical role in optimizing power usage, with products designed to minimize energy loss and enhance overall system efficiency.

## Conclusion

The successful completion of this project provided the financial institution with a comprehensive, single-window solution encompassing Power Distribution, User Interface, Protection, Cable Management System and Digital Infrastructure.

This upgrade ensured a safe, energy-efficient and future-proof electrical infrastructure with the following benefits:

- **Enhanced Safety:** Reduced risks of electrical failures, ensuring compliance with industry standards.
- **Optimized Energy Efficiency:** Lower power consumption, leading to cost savings.
- **Long-term Reliability:** A scalable, well-integrated system designed to seamlessly accommodate future energy demands.

Through this strategic collaboration, Legrand reinforced its commitment to delivering high-performance, end-to-end electrical solutions tailored to the evolving needs of the BFSI sector.
