

LEGRAND and GOKULAM FILM STUDIO

FROM VISION TO REALITY IN JUST 8 MONTHS: LEGRAND POWERS STATE-OF-THE- ART GOKULAM FILM STUDIO

Sree Gokulam Group, renowned for its ventures in finance and entertainment, has added another landmark to its portfolio: Gokulam Studio — a sprawling 80,000 sq. ft. film production complex in Kizhakkambalam, Kerala. Inspired by iconic production spaces like Ramoji Film City, this facility was designed to support large-scale film shoots with world-class infrastructure.

Challenges

Transforming a bold vision into a fully operational studio in just eight months required not just ambition but flawless execution. The timeline from concept to completion was tight, with no room for delays or compromise on technical excellence, safety, or scalability.

Legrand's Solution

Legrand provided comprehensive electrical support, ensuring on-time delivery through an integrated suite of solutions:

Switchgear: ACBs, MCCBs, contactors and meters.

User Interfaces: Arteor range in common areas.

Protection Devices: MCBs, DBs and RCDs.

Infrastructure: Pop-up boxes, Valrack Networking Racks.

Implementation

Design commenced in early 2023 under Desionics Project Designs. By October, Legrand's solutions were finalised and approved. Zeus Electric Controls initiated installation in December 2023, executing the work with precision and efficiency. By June 2024, right on schedule - Gokulam Studio opened its doors, standing as a model for fast-track, high-performance construction.

Conclusion

Thanks to a seamless collaboration between Desionics, Zeus Electric Controls, and Legrand not only met the timeline but delivered a robust, future-ready film facility. It stands today as a testament to the Sree Gokulam Group's vision and Legrand's commitment to performance-driven solutions in the entertainment infrastructure sector.
